Why Businesses Choose Lekhankan

Reduce Accounting Costs by up to 60%

Access highly qualified accounting professionals without the overhead of hiring an in-house finance department.

Dedicated Offshore Accounting Team

Work with dedicated bookkeepers, accountants, reviewers, and finance specialists aligned with your business.

Qualified Chartered Accountants

Our accounting operations are supervised by Chartered Accountants, ensuring quality, consistency, and professional financial reporting.

Technology-Driven Accounting

We utilize leading accounting platforms including QuickBooks Online, Xero, Bill.com, Gusto, Dext, Stripe, and Power BI.

Secure & Confidential

Your financial information is handled using secure workflows, role-based access, confidentiality agreements, and standardized quality controls.

Scalable Accounting Solutions

Whether you need one bookkeeper or a complete offshore accounting department, our delivery model grows with your business.

Absolutely. For the **Lekhankan website**, I would keep each description around 40–60 words, with a professional North American tone and SEO-friendly terminology. I would also avoid making the descriptions sound like generic outsourcing copy.

OUR SERVICES

Offshore Bookkeeping Services

Daily Transaction Recording

We maintain accurate records of your day-to-day financial transactions, including income, expenses, deposits, and payments. Our team categorizes transactions according to your Chart of Accounts and accounting policies, ensuring your books remain current, organized, and ready for reconciliation, reporting, tax preparation, and informed business decision-making.

Bank Reconciliation

We reconcile your bank accounts regularly by comparing accounting records with bank statements and investigating discrepancies. Our process identifies missing transactions, duplicates, timing differences, bank charges, and unexplained balances, helping maintain accurate cash positions and ensuring your financial statements reflect reliable and up-to-date banking information.

Credit Card Reconciliation

We reconcile business credit card accounts against monthly statements, reviewing purchases, refunds, payments, fees, and outstanding balances. Our accounting professionals identify duplicate or incorrectly categorized transactions and ensure every card activity is properly recorded, supported by documentation, and reflected accurately in your financial records.

General Ledger Maintenance

Our team maintains a clean and organized General Ledger by accurately recording transactions, reviewing account classifications, and identifying unusual or incorrect entries. Regular General Ledger reviews help ensure financial information remains reliable and provide a strong foundation for monthly closing, financial reporting, tax preparation, and management analysis.

Chart of Accounts Management

We help maintain a structured Chart of Accounts aligned with your business model, reporting requirements, and accounting policies. Our team reviews account classifications, identifies redundant or incorrectly used accounts, and maintains consistency across transactions, enabling clearer financial reporting and more meaningful analysis of revenue, expenses, assets, liabilities, and profitability.

Journal Entries

Our accounting professionals prepare and post appropriate journal entries for accruals, prepayments, depreciation, reclassifications, payroll adjustments, loan activity, corrections, and other accounting requirements. Each entry is reviewed for proper account classification and supporting documentation, helping ensure your financial statements accurately represent the underlying business activity.

Month-End Bookkeeping

We manage the complete month-end bookkeeping cycle, including transaction review, reconciliations, adjustments, account analysis, and financial statement preparation. Our structured closing process helps ensure your books are complete and accurate each month, enabling management to receive timely financial information and identify trends, issues, and opportunities.

Historical Bookkeeping Cleanup

If your books are outdated, inconsistent, or unreconciled, our team can perform historical bookkeeping cleanup. We review prior transactions, reconcile accounts, correct classifications, remove duplicates, address outstanding items, and organize financial records, helping bring your accounting system to an accurate and reliable position.

Accounting Outsourcing Services

Dedicated Staff Accountants

Lekhankan provides dedicated accounting professionals who work as an extension of your

finance team. Our accountants can manage bookkeeping, reconciliations, journal entries, reporting, AP/AR support, and other accounting operations according to your processes, technology environment, and reporting requirements, providing scalable expertise without the overhead of traditional hiring.

Senior Accountants

Our Senior Accountants provide advanced accounting support for businesses requiring greater oversight and technical expertise. They handle complex reconciliations, month-end closing, financial statement review, journal entries, accounting analysis, and process supervision while coordinating with management and other team members to maintain accuracy and timely financial reporting.

Accounting Managers

Our Accounting Managers oversee accounting operations, team performance, month-end closing, reconciliations, reporting, and client communication. They establish workflows, monitor quality, resolve accounting issues, and ensure deliverables meet agreed standards, providing clients with a dedicated layer of management between day-to-day bookkeeping and senior financial leadership.

Financial Controllers

Our Controller support helps businesses strengthen financial oversight, accounting controls, reporting, closing procedures, and financial operations. Controllers can review accounting processes, supervise teams, analyze financial statements, establish controls, and support management with reliable financial information, making this model suitable for businesses that need controller-level expertise without a full-time in-house hire.

Virtual Finance Team

Build a dedicated offshore finance function through Lekhankan with bookkeepers, accountants, senior accountants, reviewers, and finance managers working together. We design the team around your transaction volume, reporting requirements, industry, software environment, and growth stage, creating a scalable finance operation that can expand as your business grows.

Accounting Review Team

Our independent accounting review team provides an additional layer of quality assurance over bookkeeping and accounting deliverables. Reviewers examine reconciliations, account classifications, journal entries, financial statements, and supporting documentation to identify errors or inconsistencies before reports are delivered to management or external accounting professionals.

Accounts Payable Outsourcing

Vendor Onboarding

We support structured vendor onboarding by collecting required vendor information,

maintaining vendor records, organizing documentation, and establishing appropriate accounting classifications. A standardized onboarding process helps reduce duplicate vendors, improve data quality, strengthen payment controls, and ensure vendor information is readily available for accounts payable and reporting activities.

Invoice Processing

Our team processes supplier invoices by reviewing invoice details, verifying supporting documentation, coding expenses, assigning appropriate accounts, and entering bills into the accounting system. We can work with platforms such as QuickBooks Online and Bill.com to streamline invoice processing while maintaining organized records and approval workflows.

Approval Workflow Support

We help establish and manage structured invoice approval workflows based on your organization's authorization policies. Invoices can be routed to appropriate managers for review and approval before payment, creating greater visibility, accountability, and control while reducing the risk of unauthorized, duplicate, or incorrectly processed vendor payments.

Bill.com Management

Our team can manage day-to-day Bill.com workflows, including invoice entry, coding, approval routing, payment scheduling, vendor records, and synchronization with accounting systems. We help businesses streamline accounts payable operations while maintaining proper documentation, approval controls, payment visibility, and accurate accounting records.

Payment Scheduling

We support organized payment scheduling by monitoring approved vendor bills, payment due dates, payment terms, and outstanding balances. Our team can prepare payment queues and coordinate approvals according to client-defined procedures, helping businesses avoid unnecessary late fees while maintaining better control over cash flow and vendor relationships.

Vendor Reconciliation

We reconcile vendor accounts by comparing bills, payments, credits, and outstanding balances against vendor statements and internal accounting records. Our team identifies missing invoices, duplicate payments, unapplied credits, and discrepancies, helping maintain accurate Accounts Payable balances and providing management with a reliable view of outstanding obligations.

AP Aging Reports

We prepare and review Accounts Payable Aging Reports showing outstanding vendor balances by payment age. These reports help management understand upcoming obligations, identify overdue invoices, prioritize payments, and improve working-capital management while giving finance teams greater visibility into short-term cash requirements.

Accounts Receivable Services

Customer Invoicing

We support accurate and timely customer invoicing based on your contracts, sales records, projects, or agreed billing schedules. Our team can prepare invoices, verify billing information, apply appropriate classifications, and maintain organized receivable records, helping businesses improve billing consistency and reduce delays in collecting customer payments.

Collections Support

Our team provides structured accounts receivable follow-up by monitoring overdue invoices, preparing aging reports, and supporting client-defined collection procedures. We can assist with customer reminders, payment status tracking, and documentation, helping businesses improve receivable visibility and maintain healthier cash flow without disrupting customer relationships.

Payment Applications

We accurately apply customer payments against outstanding invoices and accounts receivable balances. Our team reviews bank deposits, payment gateway settlements, remittance information, and customer accounts to ensure payments are properly matched, reducing unapplied cash and maintaining accurate customer balances within your accounting system.

Customer Statements

We prepare customer account statements showing invoices, payments, credits, adjustments, and outstanding balances. These statements provide customers and internal teams with a clear view of account activity and support collection efforts, account reconciliation, dispute resolution, and timely communication regarding outstanding receivables.

AR Aging Reports

Our Accounts Receivable Aging Reports provide visibility into outstanding customer balances categorized by payment age. Management can identify overdue accounts, monitor collection trends, evaluate customer payment behavior, and prioritize follow-up activities, supporting stronger working-capital management and more predictable cash flow.

Revenue Tracking

We help businesses track revenue accurately across customers, products, services, projects, locations, or other reporting dimensions. Our team reviews invoices, payments, adjustments, and accounting classifications to provide reliable revenue information that supports financial reporting, performance analysis, budgeting, forecasting, and management decision-making.

Payroll Accounting Support

Payroll Journal Entries

We record payroll-related accounting entries based on approved payroll reports from platforms such as Gusto and other payroll systems. Our team ensures wages, employer taxes, deductions, benefits, and payroll liabilities are appropriately reflected in the accounting system and reconciled with supporting payroll documentation.

Payroll Reconciliation

We reconcile payroll-related accounts by comparing payroll reports with accounting records, bank transactions, and payroll liabilities. Our process helps identify discrepancies in wages, taxes, benefits, deductions, and employer contributions, ensuring payroll-related balances are accurately represented in the financial statements.

Payroll Reporting

We organize and review payroll accounting reports to provide management with visibility into payroll expenses, employee costs, employer taxes, benefits, and related liabilities. Our reporting support helps businesses understand personnel costs and ensures payroll information is properly incorporated into monthly financial reporting and management analysis.

Gusto Support

Our team supports bookkeeping and accounting workflows connected with Gusto, including payroll report review, payroll journal posting, reconciliation, and payroll liability analysis. We work with your existing payroll process rather than replacing it, helping ensure payroll information flows accurately into your accounting system.

Payroll Liability Reconciliation

We review payroll liability accounts to ensure taxes, deductions, benefits, and other payroll-related obligations are properly recorded and reconciled. Our team compares accounting balances with payroll reports and payment records, helping identify outstanding or incorrectly recorded liabilities before month-end financial statements are finalized.

Financial Reporting

Profit & Loss Statement

We prepare and review Profit & Loss Statements that summarize revenue, cost of goods sold, operating expenses, and net income for a defined period. Our team helps ensure accounts are appropriately classified and financial results are presented clearly, enabling management to understand profitability and evaluate business performance.

Balance Sheet

Our Balance Sheet reporting provides a clear view of your company's assets, liabilities, and equity at a specific point in time. We ensure underlying accounts are reconciled and appropriately classified, giving management, lenders, investors, and accounting professionals reliable information about the company's financial position.

Cash Flow Statement

We prepare Cash Flow Statements that help management understand how cash is generated and used across operating, investing, and financing activities. Cash flow reporting provides valuable insight into liquidity, working capital, debt activity, investment decisions, and the company's ability to fund ongoing operations and growth.

General Ledger

Our General Ledger reporting provides detailed visibility into transactions posted to individual accounts. We help review account activity, investigate unusual entries, identify errors, and ensure supporting documentation is available, making the General Ledger an effective tool for financial review, audit preparation, month-end close, and management analysis.

Trial Balance

We prepare and review Trial Balances to verify that ledger accounts are properly summarized before financial statements are finalized. Our team analyzes debit and credit balances, identifies unusual accounts, and investigates discrepancies, providing an important quality-control step within the monthly accounting and financial reporting process.

Management Reports

We develop customized management reports based on your business requirements, providing relevant financial information beyond standard accounting statements. Reports can include revenue trends, expense analysis, profitability, customer performance, cash position, working capital, and other operational metrics that help management make informed business decisions.

Budget vs. Actual

Our Budget vs. Actual reporting compares planned financial performance with actual results, highlighting significant variances in revenue, expenses, profitability, and other key areas. Management can use these insights to identify performance gaps, investigate underlying causes, adjust forecasts, and improve financial planning.

Financial KPIs

We help define and report financial Key Performance Indicators relevant to your business and industry. Depending on your requirements, KPIs may include revenue growth, gross margin, operating margin, customer acquisition cost, accounts receivable days, cash conversion metrics, and other performance indicators.

Executive Dashboards

Our executive dashboards transform accounting and operational data into concise visual reports for business leaders. Using tools such as Power BI and Excel, we can present financial performance, cash flow, profitability, KPIs, trends, and variances in an accessible format designed to support faster and more informed management decisions.

Virtual Accounting Department

Dedicated Bookkeeper

A dedicated Lekhankan bookkeeper manages your routine accounting activities according to your established procedures. From transaction categorization and bank reconciliation to expense recording and bookkeeping maintenance, your dedicated resource becomes an extension of your team while receiving oversight and support from our broader accounting operations.

Dedicated Accountant

Our dedicated accountants provide broader accounting support beyond routine bookkeeping, including journal entries, reconciliations, month-end close, financial reporting, AP/AR management, and account analysis. They work within your systems and processes while coordinating with senior reviewers to maintain accuracy, consistency, and timely delivery.

Dedicated Senior Accountant

A dedicated Senior Accountant provides advanced accounting expertise for businesses with more complex reporting and closing requirements. Responsibilities can include financial statement review, complex reconciliations, month-end adjustments, accounting analysis, process supervision, and coordination with management, CPA firms, and other finance professionals.

Accounting Manager

Our Accounting Manager oversees your dedicated accounting function, ensuring day-to-day activities, month-end close, reporting, reconciliations, and team performance remain aligned with agreed service standards. The manager serves as an operational escalation point and helps continuously improve processes, controls, reporting quality, and accounting efficiency.

Controller Support

Lekhankan can provide Controller-level support for businesses requiring stronger financial oversight without maintaining a full-time in-house Controller. Services may include month-end close oversight, accounting policy implementation, financial statement review, internal controls, reporting processes, and coordination with external CPAs and management.

Virtual CFO Support

For businesses requiring strategic financial support, our Virtual CFO services can complement bookkeeping and accounting operations with financial analysis, cash flow planning, budgeting, forecasting, KPI reporting, and management insights. This creates a connected finance function where accurate accounting data can support higher-level financial decision-making.

INDUSTRIES WE SERVE

CPA & Accounting Firms

White-Label Bookkeeping

Lekhankan can operate as an extension of your CPA or accounting firm, providing bookkeeping and accounting services that support your client engagements under your established processes and service model. Our team works behind the scenes so your firm can increase capacity, improve turnaround times, and focus internal resources on higher-value advisory and tax services.

Bookkeeping Cleanup

We support CPA and accounting firms with historical bookkeeping cleanup, including

unreconciled accounts, duplicate transactions, incorrect classifications, missing entries, and outdated financial records. Our team follows structured cleanup procedures and maintains supporting documentation, helping your firm bring client books to an organized position for reporting or tax preparation.

Monthly Bookkeeping

Our dedicated team can handle recurring monthly bookkeeping for your firm's clients, including transaction processing, reconciliations, AP/AR support, journal entries, and financial reporting. We follow your firm's procedures and reporting requirements, helping you expand your client capacity without increasing the workload of your internal accounting team.

Year-End Support

We provide year-end bookkeeping support to help CPA firms prepare client records for tax and financial reporting requirements. Services can include final reconciliations, account review, cleanup, supporting schedules, transaction analysis, and documentation, allowing your professional team to focus on tax preparation, review, and client advisory work.

Staff Augmentation

Lekhankan provides flexible accounting staff augmentation for CPA and accounting firms facing seasonal workloads, hiring gaps, or capacity constraints. You can add trained bookkeeping and accounting resources when needed without committing to permanent internal hiring, helping your firm manage fluctuating workloads and maintain service levels.

Accounting Review

Our accounting review professionals can perform structured reviews of bookkeeping and financial records based on your firm's procedures. We examine reconciliations, classifications, journal entries, financial statements, and supporting schedules, helping identify issues before work is delivered to your clients or used for tax and advisory engagements.

E-COMMERCE BUSINESSES

Amazon

We support Amazon sellers with bookkeeping and financial reconciliation related to marketplace sales, fees, refunds, returns, settlements, and deposits. Our team helps reconcile Amazon activity with bank records and accounting systems, providing clearer visibility into sales, marketplace expenses, cash receipts, and overall business profitability.

Shopify

Our Shopify bookkeeping support helps businesses accurately account for online sales, refunds, discounts, payment processing fees, payouts, and related transactions. We reconcile Shopify activity with payment processors and accounting systems, helping ecommerce owners maintain reliable financial records and understand revenue, expenses, cash flow, and profitability.

WooCommerce

We provide accounting support for WooCommerce businesses by organizing sales, refunds, payment transactions, fees, and related expenses. Our team can reconcile ecommerce activity with bank and payment gateway records, helping ensure financial information is accurately reflected in QuickBooks Online, Xero, or your preferred accounting environment.

Stripe Reconciliation

We reconcile Stripe transactions with accounting records and bank deposits, accounting for processing fees, refunds, disputes, adjustments, and settlement timing. This ensures the amount deposited into your bank can be accurately traced back to underlying customer transactions and fees, reducing unexplained differences and improving financial reporting.

Inventory Accounting

We support ecommerce inventory accounting by organizing purchase, sales, inventory, and cost-of-goods-sold information within the accounting system. Our team helps reconcile inventory-related transactions and reporting, providing management with better visibility into product costs, margins, inventory balances, and the financial performance of individual products or channels.

Sales Tax Support

We organize transaction and sales information required to support your sales tax processes, including relevant sales reports, marketplace data, and accounting records. Where specialized tax filing is handled by your CPA or tax provider, our team can prepare accurate bookkeeping data and supporting schedules for efficient compliance workflows.

HEALTHCARE

Medical Clinics

We provide bookkeeping and accounting support tailored to medical practices, helping manage revenue, operating expenses, payroll accounting, bank reconciliations, vendor payments, and financial reporting. Our structured processes help practice owners maintain accurate financial records while gaining clearer visibility into profitability, cash flow, and operational performance.

Dental Practices

Our dental practice bookkeeping services cover routine accounting, bank reconciliation, expense management, payroll accounting support, accounts payable, accounts receivable, and financial reporting. We help dental practice owners maintain organized books and receive timely financial information without diverting clinical resources toward day-to-day accounting administration.

Physicians

We support physician-owned businesses and medical practices with bookkeeping, financial reconciliations, expense classification, revenue tracking, payroll accounting support, and management reporting. Our team works within your accounting systems to maintain accurate

records and provide financial visibility that supports operational planning and informed business decisions.

Healthcare Accounting

Our healthcare accounting support is designed around the financial workflows of medical and healthcare businesses. We assist with bookkeeping, reconciliations, revenue tracking, expense management, payroll accounting, accounts payable, accounts receivable, and financial reporting, helping healthcare organizations maintain organized records and stronger financial visibility.

Insurance Reconciliation

We support reconciliation of insurance-related revenue and payment information against accounting records, helping identify timing differences, outstanding balances, adjustments, and discrepancies. Our team organizes financial information so healthcare management and their professional advisors have clearer visibility into receivables, collections, and revenue-related accounting activity.

Revenue Reporting

We prepare revenue reports that provide healthcare businesses with visibility into billing activity, collections, payment trends, and revenue performance. Customized reporting can help management evaluate financial trends, understand changes in revenue, identify outstanding receivables, and support planning and operational decision-making.

REAL ESTATE

Property Management Accounting

We provide accounting support for property managers, including transaction recording, bank reconciliation, income and expense tracking, vendor payments, property-level reporting, and financial statement preparation. Our structured approach helps property managers maintain organized accounting records and gain visibility into the financial performance of individual properties and portfolios.

Rental Bookkeeping

Our rental bookkeeping services help property owners maintain accurate records of rental income, property expenses, deposits, maintenance costs, utilities, management fees, and other financial activity. We organize transactions according to your reporting requirements and provide reconciled financial records for management review and tax preparation support.

Trust Accounting Support

We support property-related trust accounting processes by maintaining organized records of receipts, disbursements, balances, and related transactions according to client-defined procedures. Where specialized regulatory requirements apply, we work alongside the client's CPA, attorney, or compliance professional to ensure appropriate processes and documentation are maintained.

Property Reconciliations

We reconcile property-level bank accounts, income, expenses, vendor payments, and other financial transactions to ensure accounting records remain accurate. Property reconciliations help identify discrepancies, missing transactions, duplicate entries, and unexplained balances while providing management with reliable financial information for individual properties and portfolios.

Investor Reporting

We prepare customized financial reports for property owners and investors, including property-level income statements, expense summaries, cash flow information, and other agreed performance metrics. Clear investor reporting helps stakeholders understand property performance, monitor financial trends, and make informed decisions regarding their real estate investments.

CONSTRUCTION

Job Costing

We organize and track project-related costs across labor, materials, subcontractors, equipment, and other expenses. Accurate job costing helps construction businesses understand project profitability, identify cost overruns, compare actual costs with budgets, and evaluate the financial performance of individual projects throughout their lifecycle.

Project Accounting

Our project accounting support connects financial transactions with individual construction projects, helping management monitor revenue, costs, budgets, and profitability. We organize accounting information according to project structures and reporting requirements, providing better visibility into financial performance and supporting timely project-level decision-making.

Subcontractor Payments

We support the accounting administration of subcontractor invoices and payments by organizing bills, verifying supporting documentation, recording transactions, and reconciling outstanding balances. Our structured process helps construction companies maintain accurate Accounts Payable records and better visibility into subcontractor obligations and project-related expenses.

Progress Billing

We support progress billing workflows by organizing project billing information, approved amounts, invoices, payments, and related accounting records. Our team works with client-provided project documentation and billing procedures to ensure accounting records remain aligned with project activity and provide management with reliable receivable information.

Retention Accounting

We track retainage-related receivables and payables within the accounting records based on project documentation and client-defined accounting procedures. Proper tracking helps

construction businesses maintain visibility into amounts withheld, expected collections, outstanding obligations, and project-related balances throughout the contract lifecycle.

PROFESSIONAL SERVICES

Law Firms

We provide bookkeeping and accounting support for law firms, including transaction recording, bank reconciliation, accounts payable, accounts receivable, payroll accounting support, and financial reporting. Our team can work alongside your existing CPA or accounting professional to maintain organized financial records and provide management with timely financial information.

Marketing Agencies

Our bookkeeping services help marketing and creative agencies manage client revenue, contractor costs, software subscriptions, payroll, project expenses, accounts receivable, and profitability reporting. We organize financial information to help agency owners understand client-level performance, operating margins, cash flow, and overall business profitability.

Consulting Firms

We support consulting firms with bookkeeping, invoicing, expense management, contractor accounting, bank reconciliation, accounts receivable, and financial reporting. Our team helps maintain accurate financial records while providing management with visibility into revenue, project economics, operating expenses, and cash flow.

Architecture Firms

Our accounting support for architecture firms includes bookkeeping, project-related expense tracking, accounts payable, accounts receivable, payroll accounting support, reconciliations, and financial reporting. We help firms maintain organized accounting records and gain clearer visibility into project costs, revenue, profitability, and overall financial performance.

Engineering Companies

We provide accounting support for engineering businesses through transaction processing, project accounting, expense management, AP/AR, reconciliations, and financial reporting. Our team helps organize financial data across projects and operations, giving management reliable information for evaluating profitability, resource costs, cash flow, and business performance.

IT Companies

Our bookkeeping and accounting services support IT companies, software businesses, and technology consultancies with revenue tracking, subscription accounting support, contractor expenses, payroll accounting, reconciliations, AP/AR, and financial reporting. We help technology businesses maintain scalable finance operations as transaction volumes, customers, employees, and projects grow.

SOFTWARE EXPERTISE

QuickBooks Online

Lekhankan provides bookkeeping and accounting services using QuickBooks Online, including transaction categorization, bank feeds, reconciliations, invoicing, bills, journal entries, month-end close, and financial reporting. Our team works within your existing QuickBooks environment to maintain accurate books and deliver timely financial information.

Xero

Our team supports businesses using Xero for bookkeeping, bank reconciliation, invoicing, bills, expenses, financial reporting, and month-end accounting. We can adapt our workflows to your existing Xero setup and accounting policies while helping maintain accurate records and efficient cloud-based accounting operations.

Bill.com

We use Bill.com to support accounts payable and payment workflows, including invoice processing, vendor management, approval routing, payment scheduling, and accounting synchronization. Our team helps clients create organized AP processes with greater visibility into outstanding bills, approvals, payment status, and vendor obligations.

Gusto

We support accounting workflows connected with Gusto by reviewing payroll reports, recording payroll journals, reconciling payroll-related accounts, and analyzing payroll liabilities. Our team helps ensure payroll information flows accurately into the accounting system while working alongside your existing payroll administration and compliance processes.

Dext

Dext helps streamline document capture and bookkeeping workflows by extracting information from receipts, bills, and invoices. Our team reviews captured information, validates accounting classifications, attaches supporting documents, and publishes approved data to connected accounting systems, reducing manual data entry and improving the organization of accounting records.

Stripe

We support Stripe reconciliation by matching customer payments, fees, refunds, disputes, and payouts with accounting records and bank deposits. Our team helps businesses maintain accurate revenue and payment records, identify settlement differences, and ensure Stripe activity is properly reflected in QuickBooks Online, Xero, or other accounting platforms.

Hubdoc

Hubdoc helps businesses collect and organize financial documents such as bills, receipts, and statements. Our team can manage document workflows, review captured information, maintain

supporting records, and connect approved documentation with accounting processes, helping create a more organized and efficient digital bookkeeping environment.

Expensify

We support expense management workflows through Expensify, including receipt review, expense categorization, employee reimbursement accounting, approval workflows, and synchronization with accounting systems. Our team helps ensure employee expenses are properly documented, classified, approved, and reflected accurately in the company's financial records.

Microsoft Excel

Excel remains an essential tool for accounting analysis, reconciliations, reporting, schedules, data validation, and financial modeling. Our finance professionals use advanced Excel functions, structured workbooks, pivot tables, formulas, and reporting templates to analyze accounting data and prepare customized financial schedules and management reports.

Power BI

Power BI enables us to transform accounting and operational data into interactive management dashboards. We can help present revenue, expenses, profitability, cash flow, KPIs, AR/AP aging, budgets, and trends through visual reports, giving business owners and management a clearer and faster understanding of financial performance.

NetSuite

Our team can support accounting operations within NetSuite environments, particularly for growing and multi-entity businesses requiring structured financial management. Services can include transaction processing, reconciliations, AP/AR support, financial reporting, and month-end activities, subject to the client's system configuration and accounting policies.

SAP Business One

We support accounting and finance workflows within SAP Business One environments for businesses requiring integrated financial, purchasing, inventory, sales, and operational processes. Our team can assist with transaction processing, reconciliations, reporting, and finance operations while following client-specific SAP configurations and internal accounting procedures.

WHY CPA FIRMS PARTNER WITH LEKHANKAN

Expand Your Firm's Capacity Without Increasing Payroll

Lekhankan enables CPA and accounting firms to expand their service capacity through a dedicated offshore accounting team. Instead of investing heavily in additional recruitment,

infrastructure, and training, firms can access qualified accounting professionals who work within established processes and provide scalable support as client volumes increase.

Bookkeeping

We handle recurring bookkeeping activities for your clients, including transaction recording, categorization, bank reconciliation, credit card reconciliation, journal entries, and month-end preparation. Our team works according to your firm's procedures and reporting standards, helping you increase client capacity while allowing your internal professionals to focus on higher-value services.

Reconciliations

Our team performs bank, credit card, loan, payment gateway, vendor, customer, and other accounting reconciliations based on your firm's requirements. We investigate discrepancies, document reconciling items, and maintain supporting schedules, helping your professionals receive cleaner books and spend less time on repetitive reconciliation work.

Accounts Payable

We provide back-office AP support including invoice processing, vendor management, coding, approval workflow support, payment scheduling, and reconciliation. Your firm can delegate recurring accounts payable activities to our team while maintaining visibility and control, allowing your CPAs and senior professionals to focus on advisory, tax, and client-facing responsibilities.

Accounts Receivable

Our AR support includes customer invoicing, payment application, aging analysis, statements, reconciliation, and collections support. We help your firm maintain accurate receivable records for clients while providing timely reports and documentation that support cash-flow management, financial reporting, and client advisory conversations.

Month-End Close

We can manage or support your clients' monthly closing procedures, including reconciliations, journal entries, accruals, account reviews, and financial statement preparation. A standardized month-end process helps your firm receive complete and organized financial records on schedule, reducing closing delays and improving the quality of downstream tax and advisory work.

Financial Statements

Our accounting team prepares standard financial statements, including Profit & Loss Statements, Balance Sheets, Cash Flow Statements, Trial Balances, and supporting schedules. Reports are prepared according to agreed accounting policies and client requirements, giving your firm reliable financial information for management review, tax preparation, planning, and advisory services.

Bookkeeping Cleanup

We help CPA firms resolve historical bookkeeping issues such as unreconciled accounts, duplicate transactions, incorrect classifications, missing entries, and outdated records. Our

structured cleanup process helps bring client books into an organized and reviewable condition, enabling your professionals to work with more reliable accounting information.

White-Label Accounting Support

Lekhankan can operate behind your firm's brand as an extension of your accounting team. We follow your workflows, communication protocols, quality standards, and client requirements while handling agreed accounting activities. This allows CPA firms to increase capacity and offer broader services without making their offshore support visible to the end client.

Dedicated Accounting Teams

Build a dedicated offshore team aligned specifically with your firm's workload and client portfolio. Depending on requirements, the team can include bookkeepers, accountants, senior accountants, reviewers, and accounting managers. This model provides continuity, scalability, process familiarity, and greater control compared with using ad-hoc freelance resources.

OUR PROCESS

Discovery Meeting

We understand your business, accounting requirements, existing processes, software environment, transaction volumes, reporting expectations, and challenges to design an efficient, customized outsourcing solution.

Secure Client Onboarding

We establish secure access, communication protocols, documentation requirements, confidentiality arrangements, workflows, responsibilities, and service-level expectations to ensure a smooth transition with minimal disruption.

Software Setup

We review and configure your existing accounting and finance platforms, integrations, user permissions, workflows, Chart of Accounts, reporting structures, and automation tools according to requirements.

Dedicated Team Allocation

We assign qualified bookkeeping and accounting professionals based on your industry, transaction volume, software environment, reporting needs, and operational complexity, supported by senior reviewers and managers.

Daily Accounting Operations

Our team manages agreed accounting activities, including transaction processing, reconciliations, AP, AR, expense management, documentation, journal entries, and other finance operations according to established procedures.

Quality Review

Experienced reviewers conduct structured quality checks covering reconciliations, classifications, supporting documents, journal entries, accounting balances, and deliverables before information is finalized or shared.

Monthly Financial Reporting

We complete month-end closing procedures and deliver accurate financial statements, management reports, reconciliations, aging schedules, KPIs, and customized insights according to your agreed reporting calendar.

Continuous Process Improvement

We regularly analyze workflows, identify inefficiencies, recommend automation opportunities, update procedures, and implement improvements to enhance accuracy, turnaround time, scalability, and overall accounting operational efficiency.

ABOUT LEKHANKAN

Lekhankan is an Accounting Knowledge Process Outsourcing (KPO) company built on the philosophy of combining accounting expertise with modern technology.

We help businesses simplify accounting operations, improve reporting accuracy, and create scalable finance functions through dedicated offshore accounting teams.

Our goal is not only to maintain books but to build long-term financial partnerships that create measurable business value.

Brand Story

Where Accounting Meets Heritage

Lekhankan is inspired by the Indian tradition of systematic financial record-keeping.

Long before cloud accounting and automated financial systems, merchants and businesses maintained detailed records through disciplined ledger practices.

That spirit of precision, accountability, and organized financial thinking inspires Lekhankan today.

We combine this heritage with modern accounting technology, qualified finance professionals, standardized processes, and global delivery capabilities to provide businesses and accounting firms with reliable financial operations.

From traditional ledgers to modern cloud accounting, the principle remains the same: every number should tell the truth.

Visual Language

Our website should use subtle Indian visual references.

Use:

- Fine-line geometric patterns
- Ledger grids
- Ancient manuscript textures
- Subtle Devanagari numerals/letters
- Geometric borders
- Seal-inspired shapes
- Paper/ledger motifs
- Mathematical diagrams
- Fine gold lines

Avoid:

- Gods/deities
- Religious symbols
- Excessive mandala patterns
- Elephants
- Peacock illustrations

- Taj Mahal
- Yoga imagery
- Overly colorful Indian motifs

The goal is:

Indian intellectual heritage, not "Indian tourism."

A Unique Design Element: The Ledger Grid

This could become LEKHANKAN proprietary visual element.

Use a subtle grid inspired by:

traditional accounting ledger columns

Example:

DATE	ACCOUNT	DEBIT	CREDIT

But transform it into a modern design pattern.

On the website, the lines can gradually transform into:

digital data lines → dashboard → financial chart

This creates a visual narrative:

Ledger → Data → Intelligence

Photography Style

Don't use generic stock photographs of:

- ✗ people sitting around laptops
- ✗ random Western offices
- ✗ calculators
- ✗ stacks of money

Instead, use a combination of:

Heritage

Close-up of:

- old Indian ledger
- handwritten accounting records
- traditional ink
- paper
- merchant accounting books

Modern

- Accountant working with cloud accounting
- Financial dashboards
- Team collaboration
- Technology
- Data visualization

The visual story becomes:

Past → Present → Future
